PROJECTS

Zip Pilates Studio | Repo | Link

- Redesigned website for a Pilates studio from scratch
- Created animation for hamburger menu toggle using Framer Motion
- Generated fluid type scales for responsive typography using custom JavaScript functions
- Generated color shades using Color.js library and OKLCH color space

Submit Form | Repo | Link

- Developed input form for a sign-up page
- Implemented form validation using event listeners
- Implemented password validation using regular expressions
- Designed a dark theme toggle button with preference saved to localStorage

Crypto Tracker | Repo | Link

- Developed a crypto tracker showing relevant information for 100 most popular coins using Next.js and React
- Designed table and card views to display details, as well as pagination using MUI
- Implemented the saving of view preference after page refresh using Redux and localStorage

Portfolio Website | Repo | Link

- Developed a landing page for my personal portfolio website to showcase my projects
- Styled components using Stitches
